

Overview

The main responsibilities of the Support Manager are to provide helpdesk support, software training, report building, and consulting services to end users as well as supporting Client Success Managers (CSMs). Secondary responsibilities include software testing, data import/export, and maintaining a sample demonstration account in support of the company's salesforce.

Position Responsibilities:

- Provide Level One helpdesk support. This involves handling “how to...” questions from users, diagnosing software problems, and escalating support tickets to programmers.
- Provide consulting services to customers. This consists of working with customers to identify how to best use their software. It also involves helping customers redesign their business processes so they can maximize the benefit of their new software.
- Perform software testing for software upgrades and new product releases.
- Teach product training courses to customers. This consists of delivering web-based and on-site training to small groups of customers.
- Execute the Implementation Process for new customers. This involves working with new customers and with the CSM team to perform the various steps required to implement a new customer including software setup and data loading using Microsoft Excel and other tools.
- Work closely with the UX/UI department to create innovation within the tool.

Reporting, Administration, Team Meetings

- Team Meetings
- Collaboration meetings
- Timesheets, etc.
- Documentation of processes.

Compensation:

The purpose of this plan is to create the optimum environment, processes, and metrics for achieving success and retention. Plan elements include changes to staffing levels, roles, physical and logical organization, metrics, accountability, compensation and goals.
